Understanding Your Visit and Insurance Billing

SICK VISIT This is an office visit for an acute problem or flare-up of a chronic problem. This could also be an office visit to follow-up on chronic problems (headaches, allergies, asthma, etc.).

WELL VISIT This is an office visit for a routine physical exam and to assess and monitor your child's overall health and development.

SICK/WELL VISIT This is a combination visit of a well visit exam where an acute or chronic issue is also addressed. For example, if you presented today for a well visit and you have an acute or chronic issue you would like addressed, it is considered a combination visit and must be billed differently than just a well visit or just a sick visit.

WHY IT IS BILLED DIFFERENTLY It is billed differently to account for the additional work, expertise and time required for a combination visit (additional lab work, x-ray, referrals and/or prescription medications). It involves additional documentation as well. **Physicians are required to document any and all issues addressed and include that documentation when filing claims with your insurance company.**

HOW THIS AFFECTS ME Although many insurance companies acknowledge the sick/well visit combination, some of them still require the patient to pay a copay for these visits, even if your insurance does not require a copay for well visits alone.

Well visits target preventive care and are billed as such. **Medication refills and/or other ailments, injuries, or illnesses addressed during a well visit are billed IN ADDITION to the annual physical.** These charges may be determined by your insurance to be the patient's responsibility. Also, some in office procedures may be applied to your deductible, according to your specific coverage. Please contact your insurance company to confirm your coverage for all types of doctor visits.

We realize this can be confusing, and if you have any questions or concerns after reviewing this material, please ask or contact our billing office at 670-5705.
